Portfolio

SUMMARY

Highly motivated and detail-oriented full-stack developer with expertise in designing, developing, and managing web applications. Proficient in both frontend and backend technologies, with a strong focus on creating seamless user experiences and efficient server-side logic. Passionate about solving complex problems and delivering high-quality solutions.

TECHNICAL SKILLS

- **Frontend:** JavaScript, React.js, HTML, CSS
- **Backend:** Node.js, Express.js, Django
- **Databases:** MongoDB, PostgreSQL
- **Other:** RESTful APIs, Git, Responsive Design

EXPERIENCE

Orange Infotech — Junior Software Developer

January 2024 – Present | Noida, India

- Designed and developed a responsive frontend using React.js, improving user engagement by 20%.
- Built and maintained backend services using Node.js and Django, ensuring optimal server-side performance.
- Created RESTful APIs to facilitate seamless communication between the frontend and backend.
- Integrated third-party APIs and databases, enhancing system reliability and efficiency.
- Collaborated with cross-functional teams to design and implement new features based on client requirements.
- Conducted code reviews and optimized code for performance and scalability, adhering to industry best practices.

PROJECTS

Yoga Website [\[Link\]](#)

- Developed a full-stack yoga booking platform using React.js for the frontend and Node.js for the backend with MongoDB as the database.
- Designed a dynamic, user-friendly interface to boost user retention.
- Implemented secure user authentication and role-based access controls.
- Streamlined scheduling and booking processes for classes, resulting in a 30% reduction in user complaints.

Movie Website [\[Link\]](#)

- Created a platform for browsing and streaming movies and TV series, using data from the TMDB API.
- Implemented a responsive design using HTML, CSS, and JavaScript to ensure compatibility across devices.
- Integrated streaming APIs (e.g., Smashya Stream, VSRC) to provide reliable streaming functionality.
- Enhanced user experience by incorporating real-time search and filter options.

Shopping Website [\[Link\]](#)

- Built a feature-rich shopping platform using Django and PostgreSQL.
- Developed server-side logic to manage product inventory, user accounts, and order processing.
- Designed a responsive and intuitive frontend to improve the user shopping experience.
- Implemented a secure payment gateway and real-time order tracking system, increasing sales by 15%.

EDUCATION

GGSIPU

Bachelor of Technology in Mechanical Engineering

Aug 2017 – Sep 2021

Delhi
