SUMMARY:

full-stack developer specializes in designing, developing, and managing both frontend and backend components of web applications, ensuring seamless integration and functionality.

TECHNICAL SKILLS

- **Frontend**: JavaScript, HTML, CSS, React Js
- **Backend**: Node.js, Express.js, Django
- **Database**: MongoDB, postgreSQL

EXPERIENCE

ORANGE INFOTECH   January 2024 – Present
Junior Software Developer   *Noida, India*

- Developed a responsive frontend in React, increasing user engagement by 20%.
- Developed and maintained backend services using Node.js and Django to manage server-side logic and data flow.
- Designed and implemented RESTful APIs to enable seamless communication between frontend and backend systems.
- Integrated third-party APIs and databases, ensuring reliable data interactions and improved performance.
- Collaborated with team members to design and implement new features based on project requirements.
- Participated in regular code reviews to ensure adherence to coding standards and best practices.

PROJECTS

Yoga Website [Link]

- Developed a full-stack yoga booking platform with React for the frontend, Node.js for the backend, and MongoDB as the database.
- Designed a dynamic and responsive user interface to enhance user engagement and experience.
- Integrated backend services for efficient data handling, user authentication, and API communication.
- Streamlined booking, scheduling, and content management processes by combining a user-friendly frontend with a robust backend.

Movie Website [Link]

- Developed a movie and TV series website that enables users to browse and stream content.
- Fetched data from the TMDB API and other streaming sources to display up-to-date content.
- Constructed and styled the website using HTML, CSS, and JavaScript for a responsive and engaging design.
- Implemented a responsive layout to ensure an optimal viewing experience across devices.
- Integrated streaming APIs like Smashya Stream and VSRC to deliver robust and reliable streaming functionality.

Shopping Website [Link]

- Built an e-commerce platform using Django to allow users to browse, select, and purchase products.
- Developed backend logic with Django to manage server-side operations and ensure seamless database interactions.
- Created a responsive and intuitive interface to deliver a smooth and engaging shopping experience.
- Streamlined the integration of frontend and backend components for cohesive functionality.

EDUCATION

GGSIPU   Aug 2017 – Sep 2021
Bachelor of Technology in Mechanical Engineering   *Delhi*
